The nature characteristics of Doulay salt are (1) its excessive hardness which enables it to bear any amount of rough handling without crumbling, (2) the regularity and completeness with which it flows, (3) its lightness and (4) yielding a larger number of molecules per pound when compared with the ordinary salt known as manufactured.

3. Chinganaganam is a railway station on the Madras and Southern Mahratta Railway and the present factory is situated within 2 miles of the railway line thus affording ample facilities for trade.

4. The chief object is inviting applications to take over local industry and to extend this system of manufacture of salt to other districts as well.

5. The land will be assigned on a lease of 25 years to be worked under the modified Doulay system. Under this system the lease may be called upon to deliver to Government the quantity of salt produced in the block during any one season either in whole or in part at a fixed price per gross of 120 mounds of salt. A higher rate will be offered for salt measuring over 80 mounds in the 2 months' haul. If not so called on, the salt may be taken over by Government and sold on the open market.

6. The lessee will have to bear all expenses for bringing the land into cultivation and will have to construct all necessary works as directed by the officers of the Salt Department. The initial cost may amount to about Rs. 50,000. These works will have to be maintained annually at the expense of the lessee during the term of the lease to the full satisfaction of the officers of the department.

7. It may be open to either party to terminate the lease by giving to either of them 3 calendar months' notice before the commencement of the manufacturing season. In such an event the lessee shall be entitled to claim reasonable compensation in respect of the capital expenditure incurred by him on works, buildings, construction of platforms, drying grounds and alignment of pans, etc. Proper accounts which shall be open to audit by the officers of the department should be maintained by the lessee of all such capital expenditure.

11. The alignment of the pans and the proportion of reservoirs, enclosures and crystallizing beds should be as directed by the officers of the Salt Department.

12. Out of the area proposed to be leased, nearly two-thirds of the area will have to be set apart for the construction of reservoirs and enclosures, the remaining area being utilized for crystallizing beds.

13. Under this system of manufacture of salt only one brine will be allowed to be used and not 2½ brines as ordinary circumstances.

14. Applications should be submitted with a deposit of Rs. 1,000, which may be returned into any Government treasury and the receipt enclosed. The deposit of all unsuccessful tenders will be returned to be repaid.

15. The lessee, as soon as his tender is accepted, shall have to execute a lease in a form approved by the Board of Revenue, (Revenue Revenue). If the successful lessee fails to commence the works within a fixed period both the deposit and the security amounts referred to in clauses 9 and 10 will be forfeited to Government and the land re-leased to others.

16. The lessee should be bound to maintain proper account showing quantity of salt raised, absorbed or manufactured out of it upon the end of previous and return true copies of accounts on the 31st day of April, July, October and January or within 15 days thereafter, for the quarter preceding and to produce, if required, vouchers for the same and will come in every year publish in the Madras District Gazette's statement of income derived from the business carried on upon the demand premises and of the expenditure thereon for the preceding year.

17. The lessee shall have no power during the said term of lease to deliver up, assign or part with the possession or sublet the whole or any part of the leased premises or shall be liable to be disposed of by way of sale any of the premises granted to him under the provisions of the lease except with the written consent of the lessee, his executor, administrators and assigns.

18. A copy of the lease which should be executed is available for the period of the application and may be seen at the circle office during business hours on any working day.

The Standard Barometer and Thermometer are read at 5 A.M., 10 A.M., 1 P.M., and 4 P.M., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The surface of the Barometer is twenty-two feet above the level of the sea, and the surface of the Rain Gauge is two feet from the ground. The wind, rain, and general weather registered are for the quarter Civil Day—from midnight to midnight.

The total quantity of rain collected since January 1st is 2.04 inch, the average due for the same period being 0.55 inch.
